

Portsmouth Citizens Requested to Complete Two Surveys:

- **Hampton Roads Hazard Mitigation Plan Survey**
- **Southside HIRA Survey**

(PORTSMOUTH, VIRGINIA – MAY 3, 2021) – As the Hampton Roads community, we are engaged in a planning process to become less vulnerable to natural disasters and man-made hazards, and your participation in two quick surveys will be very helpful in helping to identify concerns which could lead to strategies. The **Hampton Roads Hazard Mitigation Plan Survey** and the **Southside HIRA Survey (Hazard Identification and Risk Assessment)** give the public an opportunity to provide input for regional and local hazard mitigation policies by way of the two surveys linked below.

- The Hampton Roads Hazard Mitigation Plan Survey focuses on natural hazards within the community and includes questions regarding threat perception for 20 specific hazards. To take the survey, click here [HR Hazard Mitigation Survey](#)
- The Southside HIRA Survey includes questions about both natural and man-made/technological hazards and specifically asks questions about the top eight hazards that pose the greatest risk to Portsmouth, Norfolk, Chesapeake, and Virginia Beach communities. To take the survey, click here [Southside HIRA Survey](#)

For more information, visit the Hampton Roads Planning District Commission's website at <https://www.hrpdca.gov> or call 420-8300.
